

I am writing you in response to the ever-so effective "Do Not Call List". I am not sure why citizens have to sign-up for this, in order to have privacy in our homes from the constant assault by "Corporate America", but I welcomed an effort and signed-up. Since, this list has been in effect, I have been contacted at least six times a day. When will just one, of the government agencies that exist actually protect the people and not the corporation.
